**DETAILED ACTION**

***Examiner's Amendment***

1. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. §1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.
2. Authorization for this Examiner's Amendment was given in a telephone interview with Mr. D. Brent Kenady (Reg. No. 40,045) on November 13, 2009.
3. The application has been amended as follows:

Cancel claims 6, 19, 20 and 26.

Amend claims 1, 15 and 21 as follows:

1. (amended) A power generation system, comprising:  
  
an internal combustion engine configured to provide rotational mechanical energy;  
  
a generator configured to receive the rotational mechanical energy and generate electrical power in response to the rotational mechanical energy;

a power electronics device coupled to the, generator to transform the electrical power, generated by the, generator, the power electronics device having the capability to modify and convert the electrical power to one or more of selective forms; and

a fluid medium provided to the internal combustion engine, and to the generator for removing thermal energy from the internal combustion engine and from the generator ;

wherein the fluid medium is provided to the power electronics device for removing thermal energy from the power electronics device.

15. (Amended) A method for generating power, comprising:

providing a generator;

providing rotational mechanical energy to the generator and producing an output of electrical power in response to the rotational mechanical energy, the electrical power comprising a selectable frequency output; [and]

providing a fluid medium to the generator for removing thermal energy from the generator ;

coupling a power electronics device to the generator for selectively modifying the output of the electrical power;

wherein the fluid medium is provided to the power electronics device for removing thermal energy from the power electronics device.

21. (Amended) A power generation system, comprising:

a rotational power source component configured to provide rotational mechanical energy;

a generator component configured to receive the rotational mechanical energy and generate electrical output in response to the rotational mechanical energy;

a fluid medium component configured to remove thermal energy from the rotational power source and from the generator; [and]

a control unit configured to manage cooperation between the components of the system to optimize capabilities of the system to address different applications requiring different power demands ;

wherein the control unit comprises a package control unit, power electronics control unit, generator control unit and rotational power source control unit wherein collectively the control units have the capability to monitor any one of the following aspects of the power generation system: horsepower input, torque input, speed input and output, system component temperatures, electrical power output, power factor, voltage input and output, and power type.

***Reasons for Allowance***

4. Claims 1, 7, 8, 10-12, 15, 17, 18, 21-25 and 27 are allowed.

**5. Examiner's Statement of Reasons for Allowance:**

Applicant(s) invention relates to a power generation system, and more specifically, to a portable power generation system controls and cooling arrangements.

The system has internal combustion engine, a generator and a control electronics, which are combined to be cooled by a fluid medium, as disclosed.

There are inventions in the field that provide similar functionality and/or have similar features, as prior art of record shows. Applicant(s) invention differs from the prior art of record by the combined cooling arrangements for the engine, the generator and the electronics by the fluid medium and in combination with the other functional features is patentably distinguished from the prior art of records. The cooling and the control features are performing as disclosed and claimed, and examiner's search failed to find such combination.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
